

RELOADING COMPONENTS

Sako manufactures cases and bullets suited for reloading. Their heavy-duty quality meets the experienced hunter's demands for accuracy and durability.

Our Sako brass cases have a reputation of outlasting the competition. Made of high quality copper alloy, they have proven to sustain repeated loading noticeably better than standard cases. If you are looking for high quality cartridges and long-lasting cases, our Sako Range competition and training cartridges live up to your demands.

All Sako bullets have been developed with an eye for the distinct criteria, which is ascribed to each particular type of shooting or hunting. A fine example of this is the Cuthead competition and training bullet, which has a cutter groove that produces a clean-cut hole for easy score interpretation.
